Types of Incentive Applications

Full PDF (this application) - Retrofit Project

Projects such as replacing existing equipment with new high-efficiency equipment, or retrofitting existing equipment to improve energy efficiency.

Full PDF (this application) - New Construction Project

Projects that result in a permanent reduction in electrical (kWh) and/or natural gas (Mcf) energy use compared to baseline practices. The following project types are classified as New Construction/Major Renovation:

- New building wherein no structure or site footprint presently exists.
- Addition or expansion of an existing building or site footprint.
- Major tenant improvements that change the use of the space.
- Projects that require added energy load.

Business Instant Discount Program

Instant savings, no application required! Simply purchase the products from participating distributors to receive the instant discount. Pages 45 and 46 contain a list of all the eligible products. The incentive is a discount at the point of purchase from participating distributors.

For full details, visit ConsumersEnergy.com/instantdiscount.

Bonus Incentives

Buy Michigan Bonus

Customers who use Michigan-made products in their energy saving projects may be eligible for an additional 20% bonus incentive. An affidavit from the manufacturer attesting the product is at least 50% manufactured and assembled in the state of Michigan (exclusive of packaging) is required. Look for this symbol:  and check the Buy Michigan box located next to eligible measures throughout the application to receive your bonus!

Incentive Caps and Limits

Incentives are subject to limits in order to encourage equitable distribution of funds among as many Consumers Energy customers as possible. Incentive caps are imposed annually and are calculated based upon the program year in which the incentive is paid to the customer.

Customer Annual Limits

The amount of incentives a facility or customer can receive is limited. A facility is defined as a single customer who is responsible for paying the Consumers Energy electric and/or natural gas bill. A customer is defined as the organization under which the company (or companies) are owned or operated, regardless of who is responsible for paying the bill. Program year incentive limits are per customer, facility, project or measure as shown below.

Prescriptive Incentives	100% of the total project cost, and per measure, facility, or project where specified in this Application or the Incentive Catalog
Custom Incentives	50% of the total project cost
Electric Customer Incentive Limit	\$2 million across all facilities per customer
Natural Gas Customer Incentive Limit	\$1 million across all facilities per customer
Natural Gas Custom Tiers per Customer	100% of the calculated natural gas incentive up to \$500,000 50% of the calculated natural gas incentive above \$500,000

About this Application

Consumers Energy Business Energy Efficiency Programs offer incentives to help businesses reduce energy use by improving the efficiency of their equipment. Prescriptive incentives are cash incentives for implementing many common energy efficiency improvements. Custom incentives are cash incentives for making certain energy efficiency improvements not covered by prescriptive incentives.

All Consumers Energy commercial and industrial customers are eligible for prescriptive and custom incentives.

Pre-Notifications

A Pre-Notification Application is required for most projects, including all custom incentive and new construction projects. It is recommended for projects requesting incentives over \$10,000. Check the current Incentive Application and Catalog for the measures you plan to implement to see if a Pre-Notification Application is required.

RETROFIT PROJECT PRE-NOTIFICATION

1. Completed Applicant Information sheet (page 6).
2. Supporting documentation (see Incentive Catalog for detailed descriptions of measures, equipment specifications and other requirements).
3. Specification sheets for all proposed equipment.
4. Business energy efficiency measure worksheets for incentives requested.

NEW CONSTRUCTION PRE-NOTIFICATION

- Measures that may qualify for new construction are designated by a "  " symbol on the left of the measure.
1. Completed Applicant Information Sheet (page 6).
 2. Supporting documentation (see Incentive Catalog for detailed descriptions of measures, equipment specifications and other requirements).
 3. Specification sheets for all proposed equipment.
 4. Business energy efficiency measure worksheets for incentives requested.

Terms and Conditions

As an eligible Consumers Energy customer, I certify the indicated energy efficiency measures were installed during the 2024 program year. The energy optimization measures are installed in a qualifying facility, with a qualifying account, paying the Energy Waste Reduction surcharge and not for resale. Additional Program Terms and Conditions may be found in the Policy and Procedures Manual available at

ConsumersEnergy.com/startsaving.

I understand that in the event the application received a reservation, that reservation is not a guarantee of payment. Incentive payment will be based upon the final application meeting the Program Terms and Conditions.

Selected Terms and Conditions include, but are not limited to:

- Project funds are reserved for 90 days from the date of the reservation letter (18 months for New Construction projects). Inside the 90-day and 18-month time-frame, you must submit your Final Application within 60 days of your project completion.
- The Program has a limited budget, but is an annual program. Applications will be processed until allocated funds are fully subscribed or spent each program year. Incentive amounts are subject to change at any time within the program year; however, reserved incentive amounts will be honored within a program year.
- New Construction final applications must be received by November 30 of the program year to qualify for the current year's funding. Multi-year project incentives may vary in accordance with program year changes.
- All equipment must be purchased and installed prior to submitting the Final Application.
- All equipment installed must meet the minimum specifications as stated in the Incentive Catalog and in the Program Terms and Conditions. Failure to meet the minimum specifications will result in disqualification of the measure or incentive payment.
- Applicant agrees to inspection and measurement activities by the utility or its representatives of both project payment and equipment installation for up to five (5) years from the project completion date.
- Incentives may be taxable, and the applicant is solely responsible for the payment of any resulting taxes. Incentives will be reported to the IRS, unless applicant is a corporation or tax exempt.
- From the project completion date the applicant may be required to refund some or all of the incentives if the measures do not remain (or were not) installed for a period of five (5) years or the end of the product life, whichever is less.
- All materials removed, including lamps and PCB ballasts, must be taken out of service permanently and disposed of in accordance with local, state and federal codes and ordinances. The Applicant is responsible for being aware of any applicable codes or ordinances. Information about hazardous waste disposal may be found at Michigan.gov/egle.
- For certain measures, the incentive amount will be determined based on the estimated energy savings. The Applicant may be required to provide documentation on energy savings calculations and assumptions. Consumers Energy will make the final determination of the energy savings and thus the incentive amount to be paid.
- Consumers Energy has no obligations regarding and does not endorse or guarantee any claims, promises, work, or equipment made, performed, or furnished by any contractors or equipment vendors that sell or install any energy efficiency measure.
- I have read and understand the Program Requirements, Measure Specifications and Program Guidelines set forth in this Application, the Incentive Catalog and the Program Policy and Procedures Manual and agree to abide by those requirements. Furthermore, I concur that I must meet all eligibility criteria in order to be paid under this program and not receive incentives from any other utility for the same project.
- I certify that the information on this application is true and accurate. I understand that Consumers Energy and its authorized agents may utilize my account information and project scope to evaluate my Application for compliance with the Program Policy and Procedures Manual. I authorize Consumers Energy to utilize certain information including, my company name, energy savings and incentive value for regulatory and promotional purposes. If I choose to subsequently opt out of any recognition, I must indicate this choice in a written letter to the Consumers Energy Business Energy Efficiency Programs team.
- Reserved incentive amounts are not guaranteed and the actual amounts will be based on a review of the final application and supporting documentation (and may be capped at the reserved amount).
- The final incentive amount will be based on the program requirements for the program year for which the incentive is paid.
- We are committed to keeping your email address confidential. We will never sell, rent, or lease our subscription lists to third parties, and we will not provide your personal information to any third party individual, government agency, or company at any time unless compelled to do so by law.
- We will use your email address solely to provide timely information about the Consumers Energy Business Energy Efficiency Programs and your projects.
- In compliance with the CAN-SPAM Act, all email sent from our organization will clearly state who the e-mail is from and provide clear information on how to contact the sender. In addition, all email messages will also contain concise information on how to remove yourself from our mailing list so that you receive no further email communication from the Consumers Energy Business Energy Efficiency Programs.

Permanent Interior T8 or T12 Fluorescent Lamp Removal (Pre-Notification Required)

(Consumers Energy Electric Customers)

ID	Measure	Incentive	Unit	# of Units	Total Incentive
LT127	T8 or T12 2-Foot or 3-Foot Lamp Removal	Must be combined with an LED Tube Light measure (LT101 - LT126).	\$1.50	Lamp Removed	
LT128	T8 or T12 4-Foot Lamp Removal		\$5.00	Lamp Removed	
LT129	T8 or T12 8-Foot Lamp Removal		\$12.00	Lamp Removed	

*Notes:

UL Type A: TLEDs are used as a direct replacement for existing fluorescent tubes, reusing the existing fluorescent ballast and lamp holders to connect the TLED to the fixture.

UL Type B: TLEDs typically use the lamp holders (either existing or retrofitted) to connect the TLEDs to the existing fluorescent fixture and the existing fluorescent ballast is bypassed or removed. TLEDs have internal drivers and run off line voltage.

UL Type C: TLEDs are connected to the low voltage side of a new TLED external driver and the existing fluorescent ballast is disconnected and fully removed from the existing fluorescent fixture.

Dual Mode (DM) Internal Drivers (UL Type A and Type B): TLEDs may operate off the existing fluorescent ballast or be rewired to operate off line voltage. They have the same requirements as Type A or Type B TLEDs.

Total Incentive											

*Total incentive per ton equals the qualifying base incentive per ton plus the maximum incentive per efficiency increase. The incentive per efficiency increase will be calculated as the maximum incentive between Path and Path B.

- For example: One 100-ton air-cooled chiller at 0.75 kW/ton IPLV and 1.15 kW/ton FLV
Base incentive: (A x D x F) or 100 tons x 1 x \$7/ton = \$700
Path A - Full load incentive: (A x D x [(E - B)/0.01] x G) or (100 tons x 1 x [(1.19 - 1.15)/0.01] x \$2.00 = \$800
Path B - Part load incentive: (A x D x [(H - C)/0.01] x G) or (100 tons x 1 x [(0.76 - 0.75)/0.01] x \$2.00 = \$200
Total Incentive: Base Incentive + Maximum (Path A, Path B) or \$700 + Maximum (\$200, \$800) = \$1,500

The following documentation must be included with the Incentive Application in addition to the documentation outlined above. If possible, the LEED® online portal should be shared with Program staff as an efficient means of providing project information. Energy savings will be validated per the LEED® review findings listed below.

- LEED® Certification Project Review Report and LEED® Reviewers Comments.
- LEED® 2009-EA Prerequisite 2: Minimum Efficiency Use Performance Form: This form details the building's Performance Rating Method Compliance and Total Building Energy Summary.
- EA2 Section 1.4 Table.xls from all supporting documentation submitted with the LEED® template.
- By applying for Consumers Energy LEED® Whole Building Incentive Program you are authorizing Consumers Energy staff to contact USGBC/GBCI to request the final approved LEED® report and EA2 Section 1.4 Table.xls. To streamline this process, you have the option to provide the project LEED® online access credentials to Consumers Energy staff to view the final approved reports.

Total LEED® Whole Building Incentive

You know your business best. We'd like to work with you to find creative, custom and effective ways to upgrade the energy efficiency of your operations. We'll support your efforts with rebates based on the amount of energy you save over your base annual energy use.

Eligible natural gas customers will receive \$12 per Mcf of natural gas saved, up to \$500,000 each year with an additional 50% of calculated rebates above \$500,000. Consumers Energy electric customers will receive \$0.10 per kWh of electrical energy saved per year, up to \$2 million across all facilities per customer. All custom incentives are capped at 50% of the total project cost. The Business Energy Efficiency Program is one of several programs designed to help you save energy and money while protecting the plant. Together, we can take an active role in building a clean energy future for Michigan. Learn more at [MICleanEnergy.com](#).

Pre-Notification is REQUIRED for all Custom Incentives

*Simple Payback Period must be greater than or equal to one year and less than or equal to 15 years to receive the incentive.

**Total Awarded Incentive cannot exceed 50% of the total custom project cost or customer annual limits, whichever is less.

***If New Construction, the baseline shall be in accordance with Michigan Energy Code or standard customary practice.

**** Natural Gas custom incentives are awarded at 100% of the calculated incentive up to \$500,000, and at 50% of the incentive above \$500,000.

APPENDIX

Variable Frequency Drive Information Worksheet

Completed worksheet must be included with the Incentive Application for all custom incentive VFD projects and where specified for prescriptive VFD measures. In addition, must complete a minimum of seven continuous days of line side (NOT load side) power monitoring before (if retrofit) and after installation (it is recommended to meter power every 15 seconds).

Fan / Pump Information

Fan or pump ID tag (from worksheet):	Type of area served by fan or pump:
If fan, note type (centrifugal, forward curve, backward curve, axial, etc.):	Equipment served by fan or pump:
Nominal Horsepower (HP) (if multiple motors, list individual HP ratings):	Nameplate motor efficiency (if multiple motors, list individual efficiencies):
Manufacturer:	Model:
Full load design conditions: Flow (CFM, GPM):	Pressure (inches static, feet of water, PSI, other):
Existing controls (discharge damper, inlet guide vanes, outlet control valve, bypass valve, etc.):	Existing set point (inches static, feet of water, PSI, other):

Operation Hours

The fan or pump operates the following hours (e.g. 0600 to 1800 or on demand):

Summer	Winter
Weekdays to	Weekdays to
Saturdays to	Saturdays to
Sundays to	Sundays to
Number of shifts per weekday:	Number of shifts per weekend day:

Existing Motor Load

The fan or pump operates the following hours (e.g. 0600 to 1800 or on demand):

Option 1
(retrofit):

Measured input power under full load: kW (true RMS power), Power Factor (PF)

Option 2
(retrofit):

Measured current and voltage under full load: Amps Volts
Three-phase load calculation = Amps x Volts x PF x 1.73 / 1,000 = kW

Option 3
(retrofit or new):

Measured or estimated fan or pump full load: kW
If estimating load, provide description, assumptions and formula used to calculate power:

Proposed Operations

The proposed VFD will be automatically controlled to maintain the following set points:

Flow (CFM, GPM, other):

Pressure (in static, feet of water, PSI, other):

If other, please describe:

APPENDIX

Compressed Air Correct Sizing Worksheet

Completed worksheet must be included with the Incentive Application when applying for the Correct Sizing Air Compressor (CA124) measure incentive. In addition, must complete a minimum of seven continuous days of power monitoring before and after retrofit (it is recommended to meter power every 15 seconds).

APPENDIX

Affidavit of Natural Gas Infrared Heater Minimum 5 Degrees Fahrenheit Setpoint Reduction

I, _____, declare that after installing an infrared radiant (IR) heater that I will set the occupied temperature setpoint of the new IR heater a minimum of 5 degrees Fahrenheit lower than the occupied setpoint temperature of the previous or baseline forced air heating system (e.g. unit heaters, furnaces, etc.). An example would be if a space maintained at 70 degrees Fahrenheit by a previous unit heater would now be set back to a maximum temperature of 65 degrees Fahrenheit maintained by the new IR heater. Please note that in most cases, the thermostat setpoint reduction accounts for most of the fuel savings of IR heaters over conventional forced air heating systems.

I further declare that:

I am an authorized representative of company purchasing the new IR heater (i.e., Customer or End User).

Occupied Thermostat Setpoint of the previous or baseline forced air system: _____ degrees Fahrenheit.

Occupied Thermostat Setpoint of the new IR heater: _____ degrees Fahrenheit (must be at least 5 degrees Fahrenheit lower than the current or baseline thermostat setpoint).

NAME and ADDRESS OF THE CUSTOMER (COMPANY) RECEIVING THE IR HEATER:

Signature: _____

Printed Name: _____

Title: _____

Date: _____

Please note: to be eligible for an infrared heater incentive from the Consumers Energy Business Solution Energy Efficiency Programs, the new IR heater thermostats must be set back a minimum of 5 degrees Fahrenheit lower than the previous or baseline forced air heating system.
