Steam System Optimization

Consumers EnergyCount on Us®

Energy savings without the pressure

Relieve the pressure of energy costs with the Steam System Optimization Program from Consumers Energy. Steam systems account for more than 30 percent of the energy used in manufacturing, according to ENERGY STAR®. By optimizing your facility's steam system, you can save over 15 percent in energy use* while saving money and reducing carbon emissions.

We can help you save with steam optimization services:

Steam System Assessments

- System review and engineering report
- Specific project assessments
- Quantified project savings
- · Level 1 System review qualitative report

Steam Trap Services

- Facility Ultrasonic Trap Audit
- Steam trap training
- Contractor network for fast replacement
- Prescriptive and custom rebates

The U.S. Department of Energy research shows between 15-30 percent of installed steam traps may fail in a steam system that has not been maintained for 3 to 5 years.* Scheduling an audit with Consumers Energy will help you identify these failures and provide you a plan to fix them.

* ENERGY STAR®

Steam system annual energy saving opportunities for your business

1-2% Insulate tank and valves

2-4% Blowdown heat recovery

1-2% Combustion controls/tuning

2-5% Steam trap repair

3-10%² Boiler stack economizers

We Are Here to Help
