

Energy Efficient Telecommunications

Consumers Energy

Count on Us®

We understand telecommunications' unique industry needs and tailored our energy efficiency program with you in mind. We know telecommunications providers are experiencing a rapid expansion in new construction and retrofitting existing infrastructure. Consumers Energy can help lower your energy bills and save you money.

Our experienced program team and energy advisors connect you to our network of preferred contractors. Together, we guide you through the process, fill out the paperwork and complete your energy efficiency upgrades while you receive the incentives. Get ready for substantial savings in these areas:

Step
01

Contact us to schedule a facility assessment where we identify savings for facility operations, power distribution, airflow management and network optimization.

Step
02

When you decided to pursue the project, we can connect you with a preferred contractor skilled in installing energy efficient systems.

Step
03

We also offer engineering support services, tools and information to assist throughout this process.

Step
04

Our inspection team secures quality control and ensures proper installation and operation of installed technologies.

Step
05

Finally, receiving incentives is simple when using our standard incentive application or when working directly with our energy advisors to create and submit a custom application.

We Are Here to Help

Consumers Energy is committed to contributing to the telecommunications market transformation. We're here to help create an energy efficient infrastructure and support Michigan's Broadband Initiative.
