Incentive Caps And Limits

The amount of incentives a facility or customer can receive is limited. A facility is defined as a single customer who is responsible for paying the Consumers Energy electricity and/or natural gas bill. A customer is defined as the organization under which the company (or companies) are owned or operated, regardless of who is responsible for paying the bill. Program year incentive limits are per facility for customer incentives as shown below.

Prescriptive Incentives:	100% of the total project cost
Custom Incentives:	50% of the total project cost
Electric Customer Incentive Limit:	\$2 million across all facilities per customer
Natural Gas Customer Incentive Limit:	\$1 million across all facilities per customer
Natural Gas Custom Tiers per Customer:	100% of the calculated natural gas incentive up to \$500,000 50% of the calculated natural gas incentive above \$500,000

Buy Michigan Bonus

Customers who use Michigan made products in their energy saving projects may be eligible for an additional 15% bonus incentive. An affidavit from the manufacturer attesting the product is at least 50% manufactured and assembled in the state of Michigan (exclusive of packaging) is required.

Custom Energy Efficiency Incentives

Apply Today!

The custom energy efficiency incentive program can help you lower your cost of operation by providing you with an incentive for installing a wide variety of equipment or implementing process improvements that result in a reduction of your electric and/or natural gas use. The more energy you save, the more your company can earn in incentives.

You'll receive \$10 per Mcf of natural gas saved, up to \$500,000 each year, with an additional 50% of calculated rebates above \$500,000. You'll receive \$0.10 per kWh of electricity, up to \$2 million across all facilities per customer at 50% of the total project cost.

What Qualifies:

- Complex Compressed Air Projects.
- Process Cooling.
- Refrigeration.
- Process Improvements.
- And other process improvements in a wide range of areas.
