Incentive Caps And Limits

The amount of incentives a facility or customer can receive is limited. A facility is defined as a single customer who is responsible for paying the Consumers Energy electricity and/or natural gas bill. A customer is defined as the organization under which the company (or companies) are owned or operated, regardless of who is responsible for paying the bill. Program year incentive limits are per customer, facility, project or measure per below.

Prescriptive Incentives: 100% of the total project cost, and per

measure, facility, or project where specified in

the Incentive Catalog or Application

Custom Incentives: 50% of the total project cost

Electric Customer Incentive Limit: \$2 million across all facilities per customer

Natural Gas Customer Incentive Limit: \$1 million across all facilities per customer

Natural Gas Custom Tiers per Customer: 100% of the NG incentive up to \$500,000

50% of the NG incentive above \$500.000

Buy Michigan Bonus

Customers who use Michigan made products in their energy saving projects may be eligible for an additional 20% bonus incentive. An affidavit from the manufacturer attesting the product is at least 50% manufactured and assembled in the state of Michigan (exclusive of packaging) is required.

Custom Energy Efficiency Incentives

Apply Today!

The custom energy efficiency incentive program can help you lower your cost of operation by providing you with an incentive for installing a wide variety of equipment or implementing process improvements that result in a reduction of your electric and/or natural gas use. The more energy you save, the more your company can earn in incentives.

You'll receive \$12 per Mcf of natural gas saved and \$0.10 per kWh of electricity saved subject to the incentive caps and limits specified above. The payback period must be between one and 15 years and the incentive is capped at 50% of the total project cost for each project.

What Qualifies:

- Complex Compressed Air Projects.
- Process Cooling.
- Refrigeration.
- Process Improvements.
- And other process improvements in a wide range of areas.
