Buy Michigan Rebate*

\$874

How energy efficiency can help your business save money:

Lighting

Save on lights that improve worker and product visibility.

Compressed Air Equipment

Reduce the cost and increase the reliability of your compressed air system.

HVAC Equipment

Ensure your employees are on-task and comfortable by installing high-efficiency HVAC equipment.

Insulation

Prevent heat loss through your building's walls and roof by increasing insulation levels.

Parking Lot Lights

Keep your workers safe while lowering your energy bills by installing LED lights.

*Rebates shown are based on typical projects where equipment meets the minimum program requirements. Your actual rebate may be different based on your specific applications. Funds for rebates are limited and available on a first-come, first-served basis.
