

A typical hotel can save from 25-30%* by upgrading to smart thermostats with occupancy-based climate control.

Are you ready to elevate your guest experience while saving on energy costs?

Introducing the Consumers Energy Guest Room Energy Management program, a no-cost solution designed to optimize energy usage and enhance guest comfort.

Imagine each guest room equipped with an energy efficient thermostat featuring occupancy sensors, along with energy efficient sink aerators and shower heads. All products and installation are provided by Consumers Energy at **no cost** to your property!

"The thermostat systems installed in the rooms have been working really well with no issues. The installation went fast and I cannot believe they did all of our rooms at no cost to us."

– Alexis, Staybridge Suites

Hotels with Consumers Energy utility accounts, with yearly electric usage up to 1,200,000 (kWh) or yearly natural gas usage up to 16,000 MCF, could be eligible to participate in this program.

Our team is here to discuss program requirements and available resources.

Energy Efficiency Impact

Here's what you can expect when you participate in the **no-cost** program:

Energy Efficient Thermostats

Our advanced thermostats come with motion detection and occupancy-based climate control, ensuring energy savings without compromising guest comfort. When a room is unoccupied, the system automatically adjusts to an energy-saving mode, and when motion is detected, it seamlessly returns to the guest's preferred comfort settings.

Hassle-Free Installation

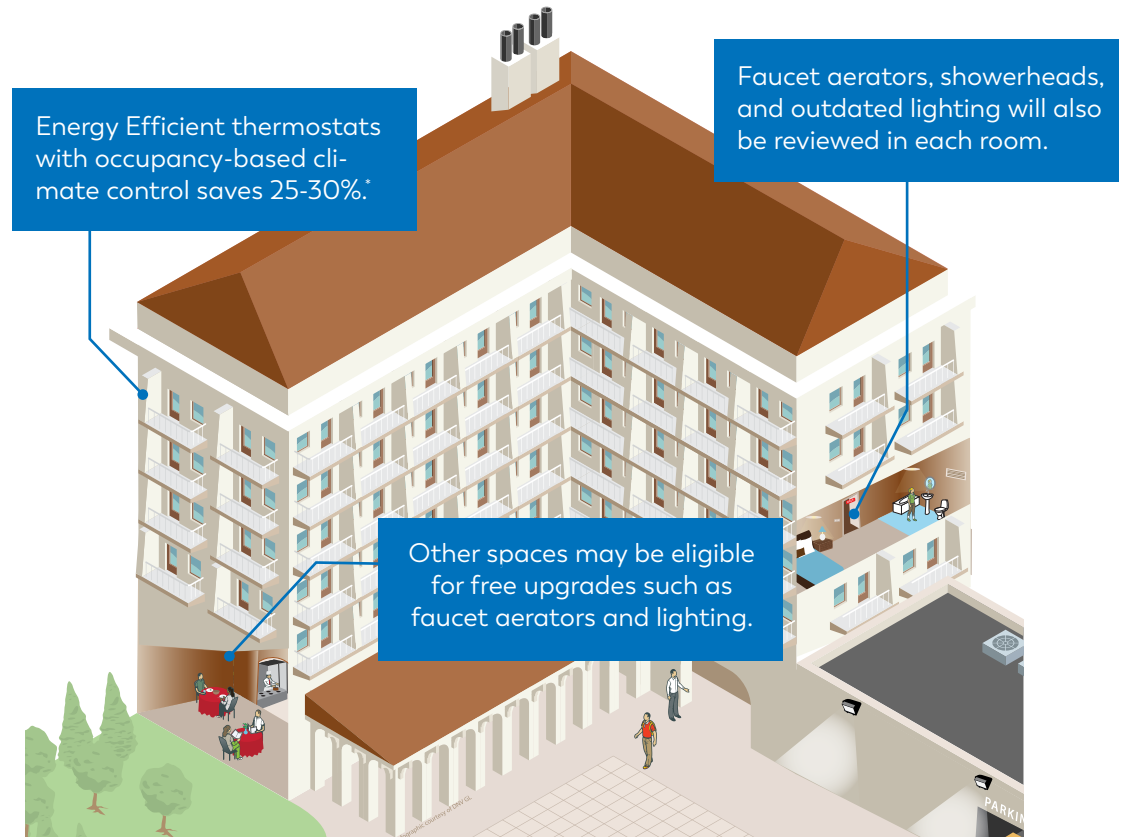

Our installation process is designed to be quick and efficient, usually taking just a few weeks to update all guest rooms. We prioritize respect for your guests by starting with vacant rooms and working around occupancy schedules to ensure minimal disruption. Our team will coordinate closely with your staff to accommodate your hotel's needs.

Comprehensive Support

After installation, our team will perform a quality check to ensure everything is working perfectly. The thermostats come with a one to three-year manufacturer product warranty and a one-year comprehensive service warranty provided by our team. For additional support, you can always contact the manufacturer directly.

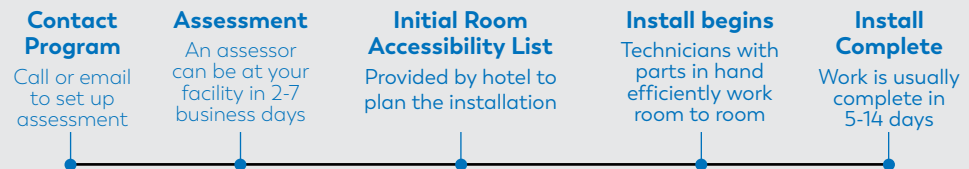

Additional Upgrades

We will also evaluate your current setup and replace inefficient products like faucet aerators, showerheads, and outdated lighting, in rooms and other spaces based on your account eligibility and existing installations.

Hassle-Free Process From Assessment to Completion

Our team works with your facility to make the entire process simple, quick and non-intrusive to the daily operation of your business.

Common process for a typical 100 room hotel.
